Anderson Farms. Spinach: planted in October, ready to eat in May. Spring plowing. Sweet corn tassels spreading pollen on the wind.

Fair Weather Acres. A row of radishes in bloom attracts bees to pollinate Fair Weather Acres peppers. Carrots, too, are destined for FSA's CSA customers.

FWA grows, harvests, and processes wholesale green beans in huge quantities, while diversifying into grain corn and a plethora of vegetables for their farm stand and CSA customers.

The Meadows is a special place for birds and bird lovers. In the sky an immature eagle and a red tail hawk soar; in a pool left by rains or receding flood waters, a snipe wades; a kestrel chick plucked from the box on the post awaits a band.

The Great Meadows Conservation Trust is a non-profit land trust formed in 1968 to preserve the floodplain's vital agricultural, scenic, archeological and wetland resources in Wethersfield, Rocky Hill and Glastonbury. The GMCT wishes to thank the CT Forest & Parks Assn. for organizing the CT Trails Day events that inspired this map, and the Central CT Health Bureau for encouraging healthy outdoor activities through the Achieve Grant funding, including printing this map.
